### How to determine coat size:

Measure the circumference of widest area of chest. This will determine your size. The length will be determined by your height (see size chart). For example, a 5'-8" person with a chest measurement of 40" will order a 40 Regular.

SHORT: 5'-3" – 5'-7"      REGULAR: 5'-7" – 5'-11"      LONG: 5'-11" and up

### How to determine shirt size:

We need two measurements. The first one is the circumference of the neck. The second measurement is the sleeve length. This is determined by measuring from the center of the back neck to the end of your wrist. Once you have both measurements, refer to the size chart to determine your shirt size.

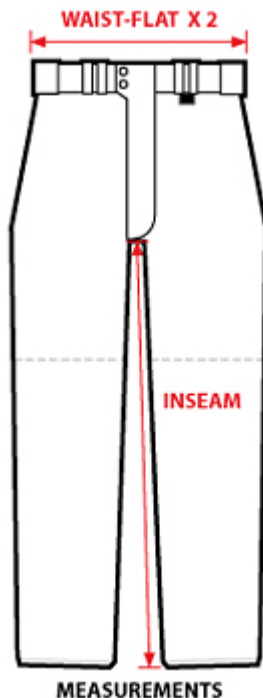

### Mens Shirt Sizes

## How to determine pant size:

We need two measurements, the waist size and inseam. Refer to the common waist size of your every day pants. To get the inseam, measure from the crotch to wear you want them bottom hem to end. Maximum inseam is 35". Hemmed pants ARE NOT RETURNABLE.

We recommend adjustable waist pants, which adjust 1" up or down in the following sizes: 25, 28, 31, 34, 37, 40, 43, 46, 49, 52, 55, 58, 61

Fixed waist pants come in the following sizes: 27 thru 40 odd and even, 41, 44, 46, 48, 50, 52, 54, 56, 58

**If you do not have the means to get the proper measurements, we recommend that you visit your local tuxedo rental store. They will often measure you for a small fee.**

**Note:** all of the above size scale charts are based on standardized measurements. since human bodies differ from individual to individual, it is recommended that each person try on the actual garment to determine proper sizing. When in doubt... go for the fuller size.
